SHAPING EUROPE'S DIGITAL FUTURE

European Digital Innovation Hubs

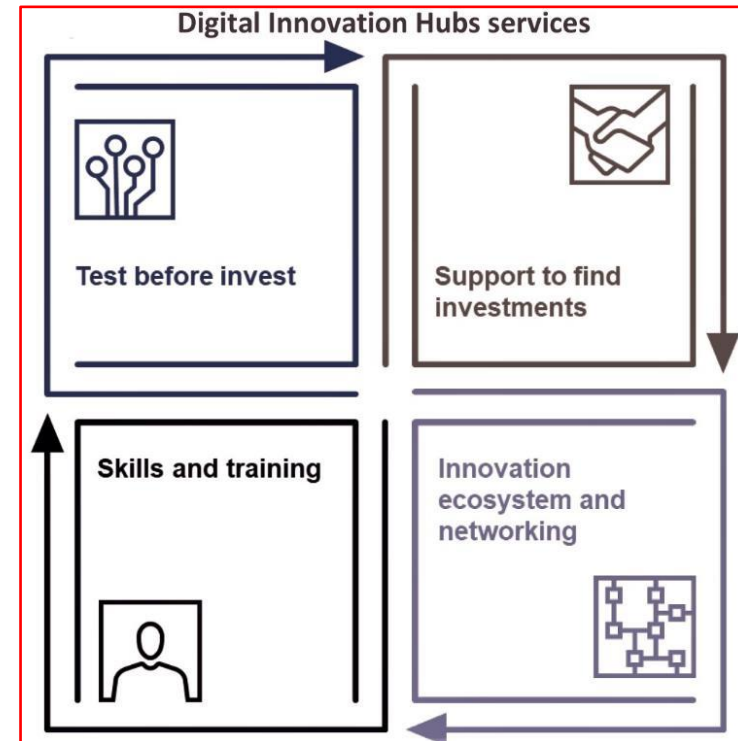

The network in brief

What is an EDIH?

Typical participants:

- Research and Technology Organisations
- Technical Universities
- Industry associations
- Clusters
- Enterprise Europe Network
- Accelerators / Incubators
- Innovation agencies
- Private companies
- Vocational training institutes...

Services for SME and public administrations

EDIH SERVICES

Offer support for digital transformation which is adapted to local needs, based on a specialisation

Build **regional ecosystems** of users and suppliers, strengthening local innovation environment

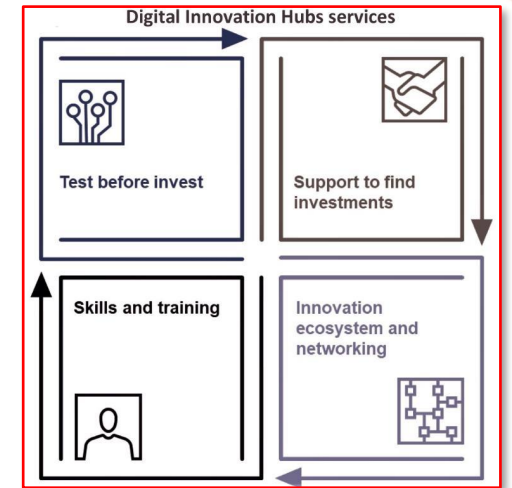

Connect to the **whole of Europe through the network:**

- Share best practices with other hubs

- Connect local SMEs to SMEs outside the region, building new value chains in Europe

- Seek synergies with innovators

- Disseminate digital capacities of Digital Europe Programme to local community

EDIH contribute to the country strategy for digitalisation

“Furthermore, they will act as a multiplier and widely diffuse the use of all the digital capacities built up under the different specific objectives of the Digital Europe Programme on High Performance Computing, Artificial Intelligence, Cybersecurity, Advanced Digital Skills” (from the work programme)

EDIH – the network today

151 EDIH funded by DIGITAL

76 Seal of Excellence EDIH
(not on the map)

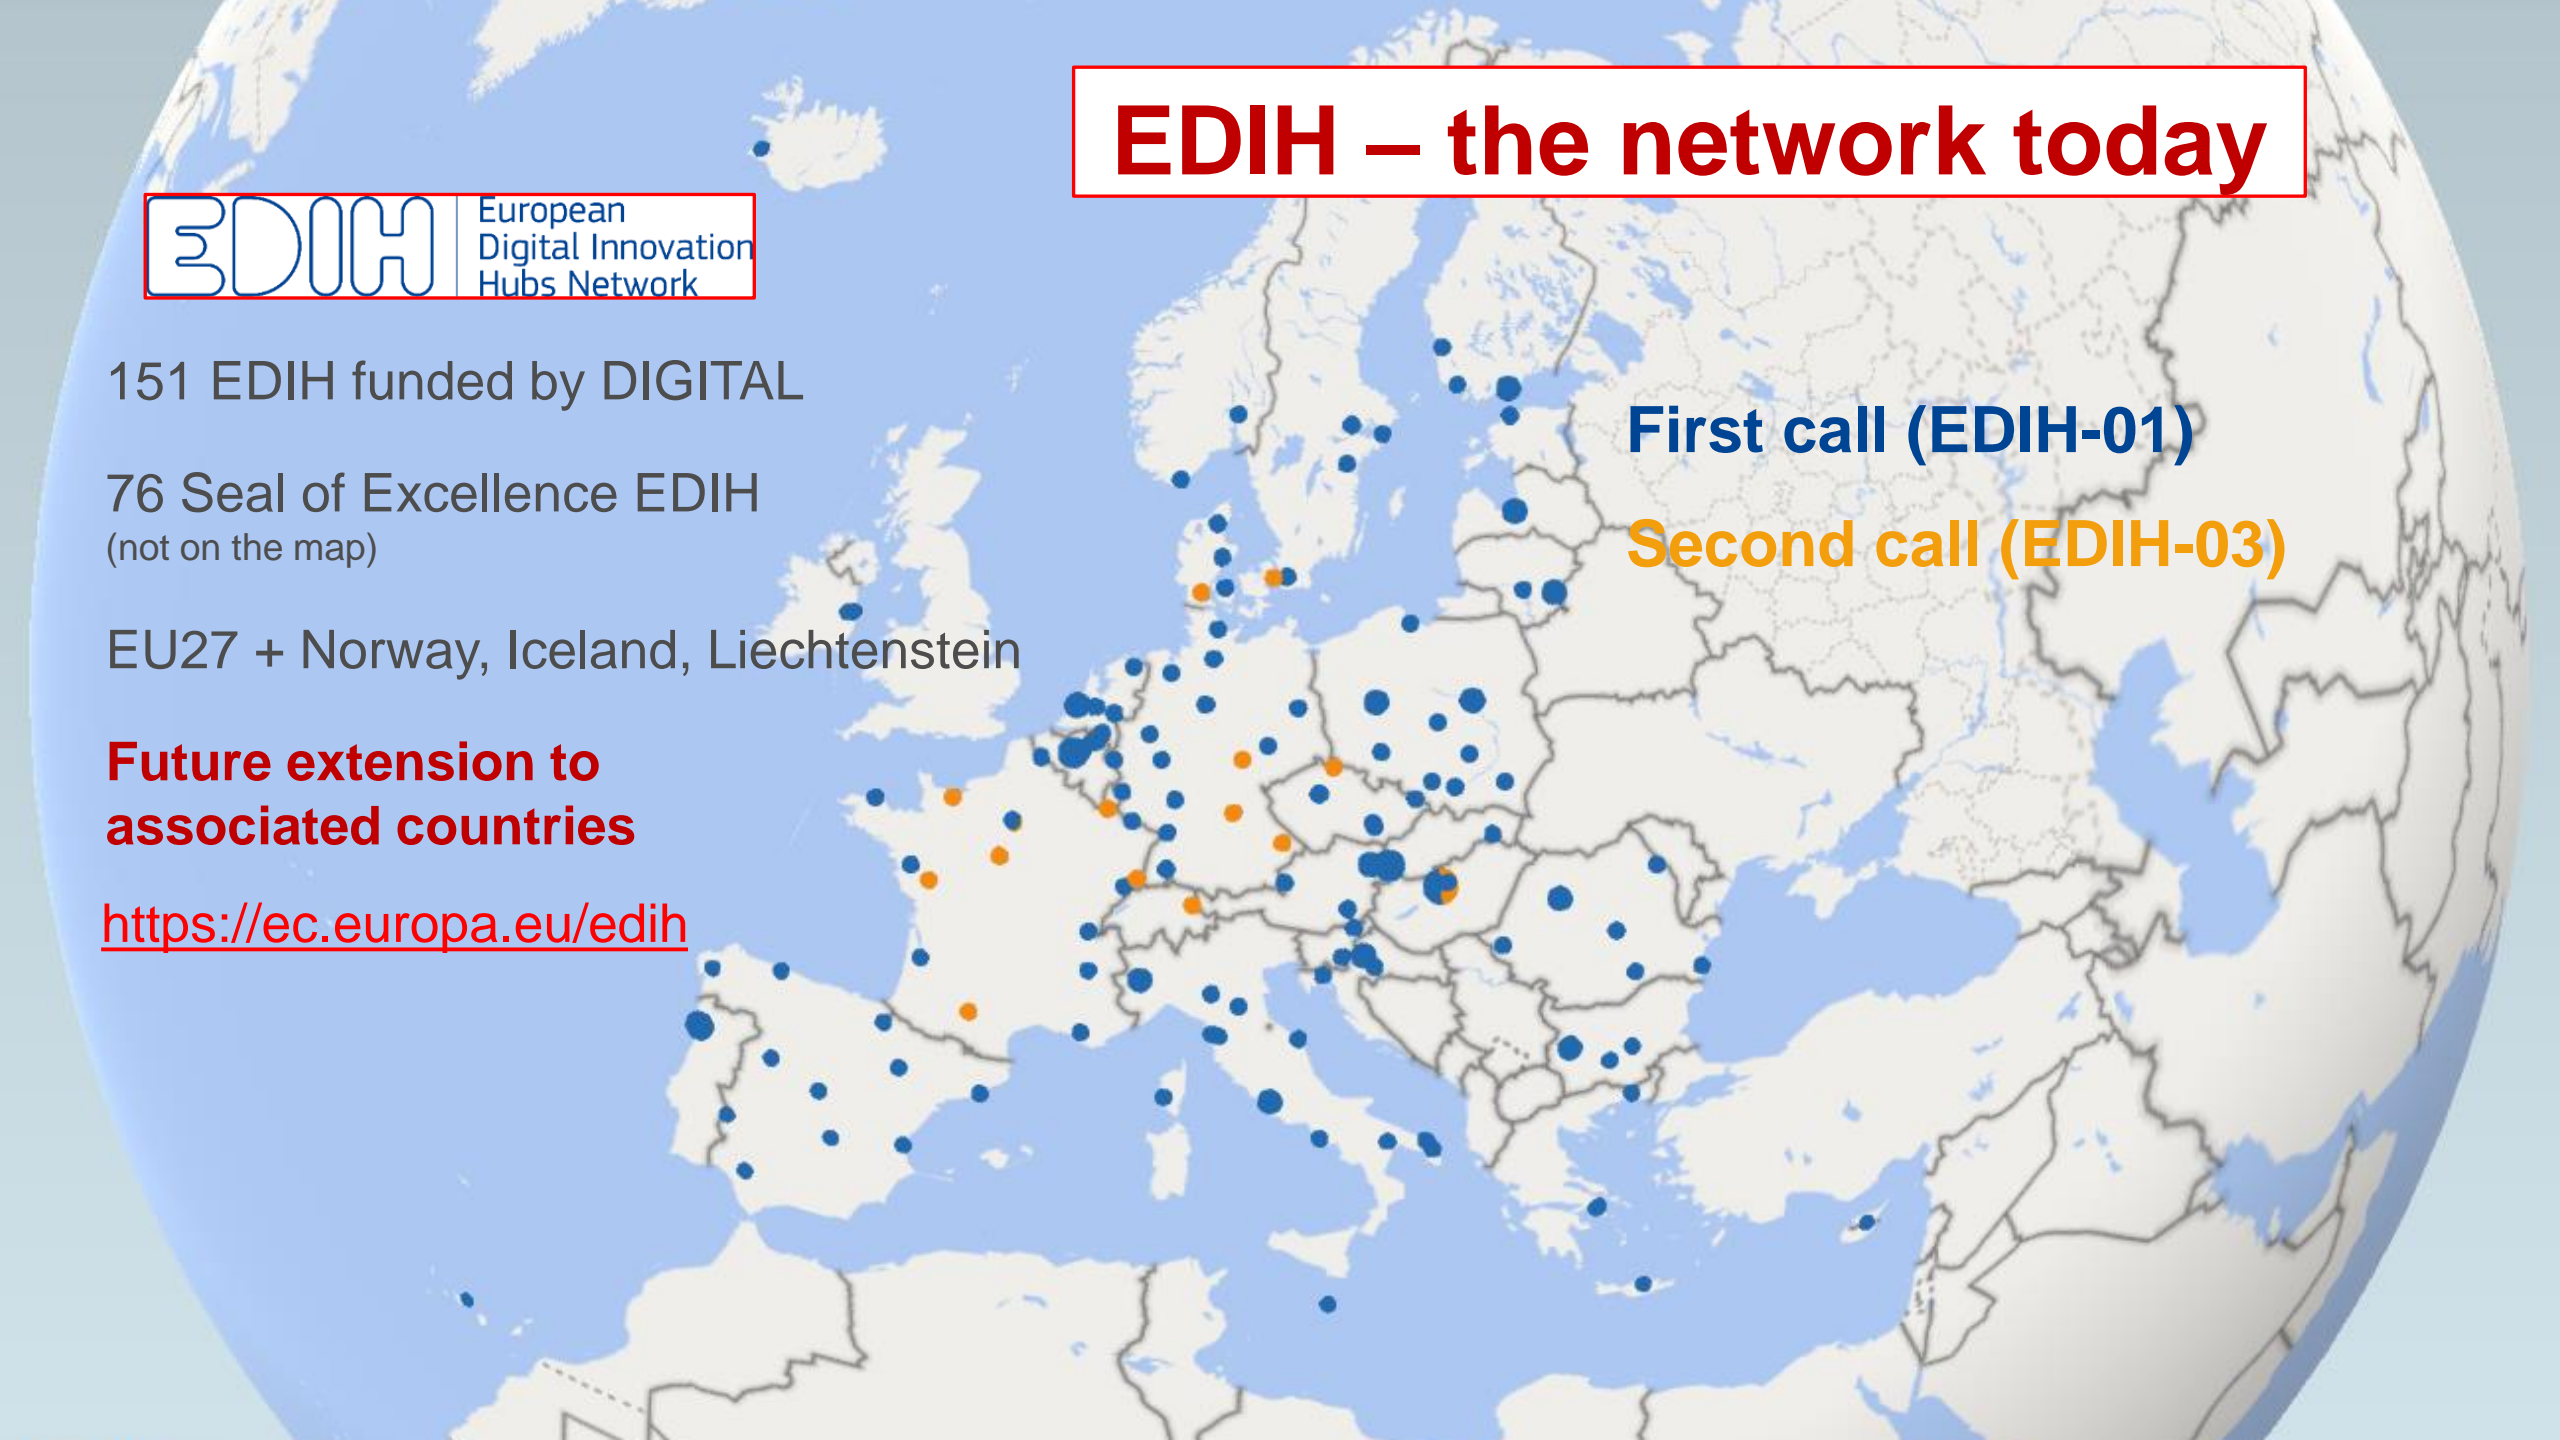

EU27 + Norway, Iceland, Liechtenstein

**Future extension to
associated countries**

Tuscany X.0

Hub information

EDIH Title	Geographical scope	Information
Tuscany EU Digital Innovation Hub	Regional Tuscany	http://www.tuscanyx.eu/ INFO@TUSCANYX.EU

Description

Tuscany X.0 (TX0) is a federation of all the main Tuscany players of research and technology transfer. It is composed of 3 System integrators, 3 Access points and 13 Providers. While the Research and Technology Transfer ecosystem is rich of highly qualified institutions at top levels in research and advanced applications, the industrial environment in the region is fragmented and composed of a myriad of SMEs, too often the last sacrificial elements of long international supply chains. TX0 aims at becoming a No-Profit System Integrator able to coordinate the technology transfer ecosystem to support the sustainable growth of the regional economy, in parallel with the enhancement of its public entities, and to concur with the other EDIHs to Europe technological independence. Tuscany needs a system integrator with a clear aim to show applied results before asking the entrepreneurs' and PA managers' commitment and investments. TX0 does not focus on technology transfer of R&D ideas and technologies with low TRL, but, instead, promotes the adoption of advanced technologies through their intelligent customization to the real industrial needs, requirements and constraints. We strongly believe that AI, CS and HPC have to be considered as a bundle and a powerful toolbox for enhancing the digital maturity level of the industry and PA in Manufacturing, Healthcare, Tourism, etc. TX0 management system is driven by the EDIH call's goals, declined into specific project objectives, measured by key results, that are obtained through activities, monitored by specific KPIs with pre-defined targets to achieve (in terms of provided services). Such management system will be implemented in a Customer Relationship Management software that will be used to track the project and to transfer the funds to partners according to the real targets they achieved. This meritocratic and evidence-based approach promotes the effectiveness of activities, their quality and lets best practices to emerge.
