Somme Numérique (SN)

France

> <https://www.sommenumerique.fr/>
> PSO in the municipal digital transformation sector

Challenges

Deploy IoT-based solutions to provide **smart and sustainable territories**, addressing sovereignty, replicability and scalability

Services

Networking and access to innovation ecosystems

Support to find investment

Test-before-invest solutions

Training and skills development

Technologies

Internet of Things

Cloud services

Big data

With the support of the EDIH Network, Somme Numérique successfully:

Deployed their first **operational interoperable digital platform**, with 10 pilot local communities engaged.

Together with the communities, identified **priorities related to efficiency and sustainability** and prototyped the expected services.

Secured funding to accelerate the development and delivery of the new services to rural communities.

Connected with other French cities and communities with similar needs to **share experience and knowledge**.

Benefits

Reduced time to market

SN accelerated the deployment of the digital solutions by at least six months to serve its first users in the ten pilot rural communities.

Ensured digital sovereignty

By using interoperable digital platforms based on open standards and open-source components, and operating under 100% public governance, SN ensures full control and autonomy over its digital services.

Solution scalability

Through harmonised data models, context information management, strong access control policies, SN can **deploy and exploit replicable and scalable digital solutions** through regional, national and European collaboration.

40%
energy savings in public buildings

25%
decrease in costs for recyclable waste collection

100%
availability of recyclable waste containers

25%
cost reduction for street lighting

SN was able to **reduce energy consumption** in public buildings, particularly in heating systems, contribute to a **more efficient waste management** and **improve overall efficiency in public infrastructure**.

The PSO also **secured cascade funding** from the H2020 dRural project open call, along with free access to an interoperable digital platform.
