> SME in the language technology and AI sector

Challenges

Develop open, trustworthy and sustainable European large language models (LLMs) at an unprecedented scale, covering underrepresented languages.

Services

Support to find investment

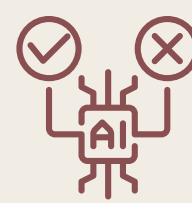

Test-before-invest solutions

Technologies

High-performance computing

Artificial intelligence & decision support

Leveraging the expertise of the EDIH Network, Miðeind successfully:

Received and utilised **high-performance computing resources** to enhance its Icelandic LLMs.

Leveraged European grants to acquire more **skilled staff** to engage in the development and improvements of LLMs.

Benefits

Access to HPC resources

EDIH-IS enabled the company to use high-performance computing resources, essential for developing advanced Icelandic LLMs.

Secured european grant support

Through the TrustLLM grant, the SME gained the opportunity for extensive collaboration with European LLM experts.

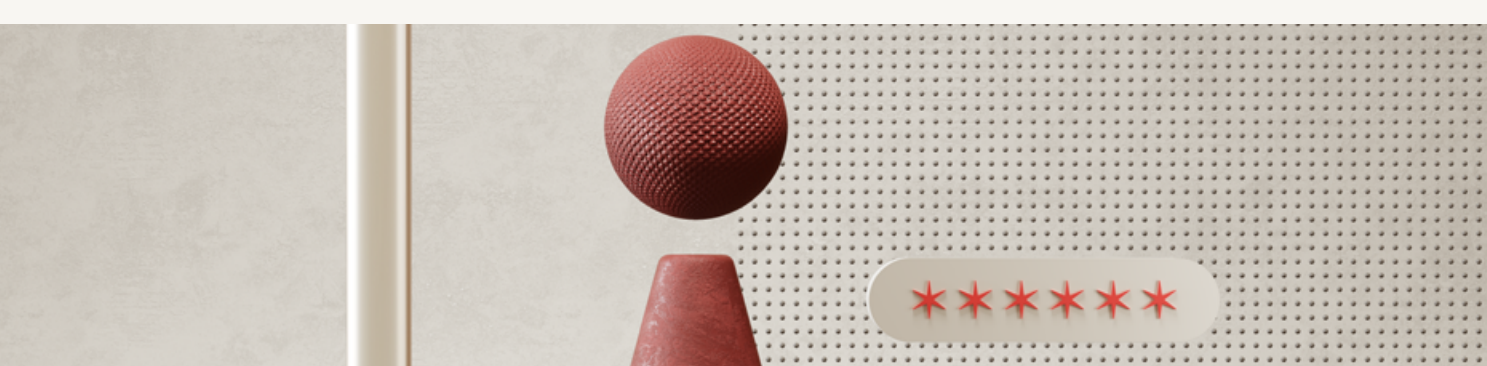

'Test before invest' environment

The combination of HPC resources and expert collaboration allows Miðeind to refine and test its LLM-derived products and services.

The project addresses the scarcity of Icelandic text corpora compared to other languages, **improving LLM fluency in Icelandic** and other low-resource languages.

The development of these LLMs **enhance the competitiveness** of companies like Miðeind.

Discover how the EDIH Network can accelerate your business's digital and sustainable transformation.
