SME

SME
Cyprus

> SME in the healthcare sector

Challenges

Develop a robust defence mechanism to secure data from cyber threats and internal risks

Services

Test-before-invest solutions

Technologies

Cybersecurity

Thanks to the expertise of the EDIH Network, the SME successfully:

Assessed vulnerabilities and identified potential points of entry to **ensure the resilience of its security infrastructure** against real-world threats.

Benefits

Minimised vulnerabilities

The company can leverage the assessment insights to **effectively mitigate the risks**, such as unauthorised access and information leakage, associated with various vulnerabilities that were identified.

Enhanced system security

This strategic approach ensures a **more robust defence** against potential threats, strengthening overall system security.

Strong ROI

By proactively addressing vulnerabilities in its systems, the SME avoids the potential costs associated with security breaches, **safeguarding its assets and reputation.**

€5,000

savings in penetration testing services

80%

reduction in vulnerabilities once the defence restructuring is complete

By protecting its systems and mitigating potential risks, the organisation ensures its **economic viability.**

This approach also fosters public trust in the **secure handling of medical information.**
